Response to Amendment

Response to Arguments

1. Applicant's arguments filed 12-06-04 have been fully considered but they are not persuasive.

Applicant argues that the polyanionic ammonium surfactants are different and better than the anionic surfactants admixed with a polyamine, according to examples 1, 5 and 13.

The examiner contends that the examples show results, which are not unexpected or commensurate in scope with the claimed invention. For example, example 1 measures the clarity of the two component, which is not considered unexpected criticality; example 5 is not commensurate in scope with the claimed invention because it comprises other ingredients not claimed and therefore one of ordinary skill in the art would not be able to surmise the criticality of the two components in question and other ingredients were varied (i.e., citrate); and example 13 shows the deposition of the fluorescent whitening agent which is again not commensurate in scope with the claimed invention given the numerous ingredients exemplified.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 6, 8, 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by JP (09003483).

JP '483 discloses a detergent composition containing an anionic surfactant whose counter-ion is a diamine salt (see abstract).

As this reference teaches all of the instantly required it is considered anticipatory.

4. Claims 1, 2 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Vander Meer (4,597,898).

Vander Meer discloses a laundry detergent composition comprising ethoxylated amines or polyamines having anionic groups (see col. 5 lines 5-60; claims and example III).

As this reference teaches all of the instantly required it is considered anticipatory.

Conclusion

5. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 12-13-04 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
